

Q-ez

Introduction

A brief introduction to your website idea. State the goals of the project.

A platform which allows the user to make or take a quiz.

The values / benefits (tangible and intangible) this application can bring to a company/organization/end-user.

Makes it easy for the creator of the quiz to add questions. Multiple ways for doing the same will be made available.

The quiz taker will also find its interface intuitive and easy to use.

Expected List of Features

A brief list of features that you expect your website to support.

1. Admin and User Dashboard
2. Login Authentication
3. Quiz setup
4. Test section

Brief justifications for including these features.

1. This is a place where the user can create new tests and access all the old tests.
2. Different interfaces and access level for different users.
3. A way to make new quizzes
4. The test area for taking the quiz

Market Survey

Do a survey of the Web to find about five websites that might have similar ideas as yours.

1. ClassMaker
2. mettl
3. CoCubes
4. TCS iON
5. FlexiQuiz

Briefly compare the features of these applications with your application idea.

Most of the features in the above applications are the same as my idea. Can add a few more features as the application progresses.
